Hand in hand

No matter which direction you're heading, you'll smile brighter and laugh louder with the Swift. Every button, instrument and control is within easy reach, providing a truly immersive driving experience and you'll find plenty of space for your entourage and essentials. Just press go and let every twist and turn be unforgettable.

CLIMATE CONTROL AIR CONDITIONING

Stay cool and comfortable whatever the season with the digital climate control air conditioning (RSC), or the manual air conditioning with digital display (GLS and GLZ).

HEATED FRONT SEATS AND A DREAM RIDE

For extra cozy comfort on cooler days, dial up the warmth with the Swift's individually controlled heated front seats (GLZ and RSC). Enjoy all the comforts of the Swift's cleverly designed cabin, with fully adjustable steering wheel, handy storage compartments, comfortable seating and flexible luggage space.

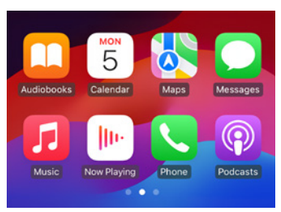

KEYLESS ENTRY AND START

Enjoy seamless access to your Swift while the keys stay safely in your pocket or bag. Unlock the door while pressing the button on the door handle. and start the car with just one push.

TOUCHSCREEN WITH ANDROID AUTO™ AND APPLE CARPLAY

The multi-media infotainment system features a high definition 9-inch touchscreen with in-built smartphone connectivity through Bluetooth® and USB connection to Android Auto™ and wireless Apple CarPlay. Connect your compatible smartphone to access navigation maps, stream music and podcasts, make handsfree phone calls and voice activated texts, and use other driver-safe apps.

SATELLITE NAVIGATION

Reach your destination with confidence with the Swift's built-in satellite navigation system. Let the easy-to-follow directions guide you to places, both familiar and new.

REVERSE CAMERA

Cleverly integrated, the reverse camera helps you park and reverse safely without having to twist around in your seat.

Got your back

It's a busy world, so keeping you safe and secure is essential. To support your safe driving, the Swift has stacks of advanced safety features including traffic sign recognition, AEB, rear parking sensors, adaptive cruise control and heaps more. So, relax and enjoy the ride.

DUAL SENSOR BRAKE SUPPORT (DSBS)

The Swift's DSBS employs a monocular camera and millimetre-wave radar to detect mid-to-long distances and pedestrians, as well as short distances and nighttime driving. These sensors collaborate to identify potential collisions and respond appropriately.

LANE KEEP ASSIST

When adaptive cruise control is activated, Lane Keep Assist helps maintain the vehicle's position in the centre of the lane. If it senses that an adjacent vehicle or structure is too close, it provides steering assistance to help maintain a safe distance.

LANE DEPARTURE WARNING AND PREVENTION

Stay securely in your lane with the Swift's lane departure system. At speeds of 60 km/h or more, the monocular camera detects lane markers. If you drift, it vibrates the steering wheel, provides a visual warning, and can steer you back into your lane.

WEAVING ALERT

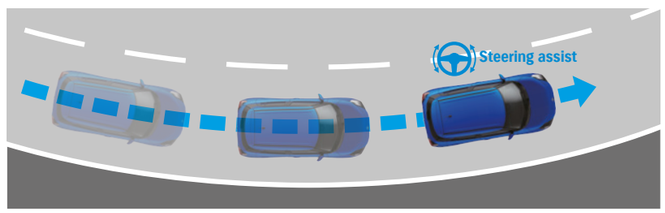

The weaving alert system monitors your driving patterns. If it detects wandering, often caused by driver fatigue, it issues both audio and visual warnings to help you stay focused.

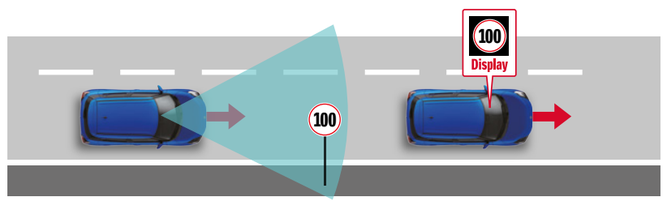

ADAPTIVE CRUISE CONTROL

The adaptive cruise control utilises millimetre-wave radar to maintain a set following distance automatically, adjusting based on your selected setting and vehicle speed. The stop & go function (CVT) brings the car to a full stop when needed.

PARKING SENSORS

Parking is made easier and safer with the Swift's ultrasonic rear bumper sensors. These sensors detect obstacles and provide both visible and audible warnings to assist you.

TRAFFIC SIGN RECOGNITION

Stay informed with traffic sign recognition. This system detects and displays traffic signs on the multi-information display, helping you stay aware of speed limits and other important information.

REAR CROSS TRAFFIC ALERT

When reversing at speeds up to 8 km/h, rear-mounted side radar sensors alert you to approaching vehicles from either side, giving both visual and audio warnings to enhance safety (GLZ and RSC).

BLIND SPOT MONITOR

Lane changes are safer with the Swift's blind spot monitor. At speeds above 15 km/h, rear-mounted radar sensors detect vehicles in or approaching your blind spots, illuminating a warning LED in the exterior mirror and providing additional alerts if you signal a lane change (GLZ & RSC).

6 AIRBAGS

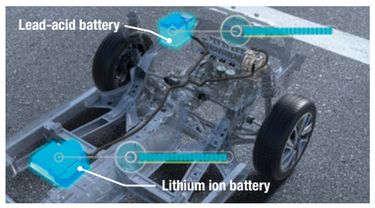

Feel safe and secure with six airbags strategically placed to protect you and your passengers. This includes front, side, and curtain airbags, providing comprehensive coverage in the event of a collision.

*Please do not rely on the Advanced Forward Detection System. It is only an aid and the ability to detect obstacles and lanes, and control the vehicle is limited. Always drive safely.

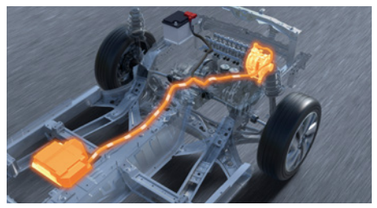

Ready when you are

Sporting a self-charging fuel saving engine, the Swift takes you wherever and whenever you want to go. With no road user charges and no plugging in, Suzuki's Smart Hybrid 12V ISG system combines a smooth petrol engine with stop-start and electric engine assist for economical and easy driving.

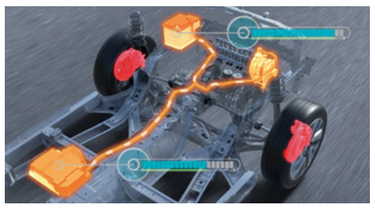

ENGINE AUTO STOP

As the Swift comes to a stop, the engine will stop and the ISG will power all the electrics, saving fuel. Once the accelerator is pressed, the ISG functions as a starter motor to silently and smoothly restart the engine.

ENGINE ASSIST

When the Swift accelerates, the ISG assists the engine, reducing the fuel consumption and lowering CO_2 emissions.

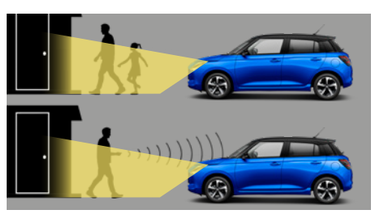

SELF CHARGING BATTERY

The Swift's ISG uses deceleration and braking energy to efficiently recharge the Swift's lithium ion battery, so there's no need to worry about plugging in.

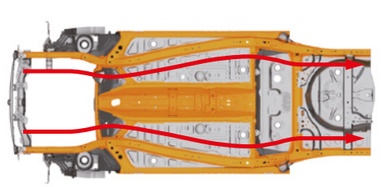

LED LIGHTING SYSTEM

The Swift's auto light-sensing LED projector headlamps automatically turn on with nightfall or low light. High beam assist turns your headlamps down when oncoming traffic approaches or the street lights are sufficient. The LED daytime running lamps keep you visible while easing electrical usage.

GUIDE ME LIGHT

When you turn off your Swift, the headlamps continue to illuminate the road for a short while after you get out. When the doors are unlocked with the remote, the headlamps turn on to lead you to the vehicle.

LIGHTWEIGHT PLATFORM

The Swift's HEARTECT platform features a high-rigidity frame that effectively disperses impact energy in a collision. Fewer joints and the use of high-tensile steel dramatically reduces vehicle weight; improving performance and fuel consumption.
